

**'move with it'**

- Essential travel companion for total music connection
- High quality sound system with low power consumption
- One AA battery will give up to 12 hours continuous play

## Micro speaker system

This versatile speaker system is designed for iPods and a wide range of other digital devices. The audio adaptor and USB cable allow you to connect the speakers to MP3 players, laptops and mobile phones so you really can 'move with it' ...

### Instructions

- ➔ To fit battery, open battery cover and install in compartment in the correct direction as indicated.
- ➔ To switch on speaker, turn the power switch to ON position. The LED on the front panel will display when active.
- ➔ To listen to iPod player or other digital devices, connect to iPod dock or audio input socket and adjust volume using dial at the back of the speaker.
- ➔ When the speaker is not in use, remember to turn off, replace dust cover on connector and remove battery to keep in good condition.
